

New Titles April 2023

Handbook of Dual Diagnosis: Assessment and treatment in persons with Intellectual Disabilities / Matson

This handbook addresses behavior problems and mental health disorders in persons with intellectual disabilities. It examines clinical issues such as cognitive performance on choice of assessment and treatment methods, service delivery systems, risk factors, functional assessment, and structured interviews. Chapters provide a much-needed reference for practitioners.

WS 107 H47 2020

Addiction Psychiatry: Challenges and recent advances / An issue of Psychiatric Clinics of North America

This issue highlights the ongoing challenges and advances in addiction psychiatry. New and promising developments, especially ones with clinical relevance are included. Also highlighted are problems and solutions that have become more prominent and mainstream in the past decade, such as harm reduction, technology addictions, and technology-based treatments.

W3 C6P7 v45 no3 2022

Psychologically Informed Physiotherapy: Embedding psychosocial perspectives within clinical management / Porter

The first of its kind for physiotherapists, this book illustrates the role social factors have on thoughts, emotions and behaviour in patients, as well as the neurobiological manifestations of social stressors. It presents key, evidence-based concepts from leading international academics, clinicians and researchers in the field and across a range of health professions.

WB 460 P73 2017

Emotional Inheritance: A therapist, her patients, and the legacy of trauma / Atlas

Atlas draws on her patients' stories—and her own life experiences—to shed light on how generational trauma affects our lives. The people we love and those who raised us live inside us; we experience their emotional pain, we dream their memories. *Emotional Inheritance* is about family secrets that keep us from living to our full potential, creating gaps between what we want for ourselves and what we are able to have.

Motivational Interviewing in Health Care: Helping patients change behavior, 2nd ed. / Rollnick, et al.

This definitive guide for health care practitioners has been completely revised to reflect important developments and make the approach even more accessible. When it comes to helping patients manage conditions and make healthier choices in such areas as medication adherence, smoking, diet, and preventive care, good advice alone is not enough. This book shows how to use techniques to transform conversations about change.

WM 143 R75 2022

Dignity in Care: The human side of medicine / Chochinov

This book aims to provide readers with what they need to know about the humanity of care and how they can engage in these facets of care in a thoughtful and meaningful way that will satisfy their patients' needs to be seen and appreciated as "whole persons." The author explores how the humanity of care can get overlooked and how to avoid this happening and teaches how to communicate better with patients, helping them to feel not just cared for, but cared about.
