

New Titles October 2023

Medical Assistance in Dying (MAID) in Canada: Key Multidisciplinary Perspectives / Springer

This book provides a multidisciplinary review of the MAID program. In the first five years of operation, the program delivered voluntary euthanasia and assistance in suicide to over 30,000 Canadians. Looking back on these first five years, the 30 Canadian scholars and clinicians contributing to this volume raise important issues and attempt to answer key questions.

Indigenous Intergenerational Resilience: Confronting cultural and ecological crisis / Williams

This book argues that there is a need to develop greater indigenous-led intergenerational resilience in order to meet the challenges posed by contemporary crises of climate change, cultural clashes, and adversity. In the face of such crises, it is essential to bring the experience and wisdom of Elders and traditional knowledge keepers together with the contemporary realities and vision of youth.

Finding Solid Ground: Overcoming obstacles in trauma prevention / Brand et al.

Even seasoned clinicians can struggle when trying to help highly traumatized and dissociative patients. This book and its accompanying workbook for patients provide an evidence-informed, pragmatic, and compassionate approach to the stabilization and treatment of complex trauma. Session-by-session guidance on how to use the program in individual and group contexts is provided.
